CarePoint

CarePoint Notifier

Replace pagers, radios, and walkie talkies with the next generation of staff communications

Working on iOS® devices, caregivers now have a powerful and easy-to-use communication system for managing alerts within the community. An intuitive display and simple touch method provides quick updates for caregivers and managers during the help call process. The caregiver can take ownership of an alert, update progress, request additional help, defer the alert to another caregiver, and close the alert with a single touch. Text messages can be sent easily to caregivers or groups from an address book. Voice calls can be made to other CarePoint Notifier devices, handsets within your community, or 911 services. All activity is recorded and can be viewed through the CarePoint Analytics™ powerful reporting suite

Features

Interactive staff communication system can leverage your existing iOS devices

Intuitive touch screen allows the caregiver to easily manage alerts

Secure messaging maintains privacy and meets HIPAA requirements

Communicate with other caregivers through texting or voice calls

Alert escalation allows caregivers to quickly request assistance

Entering incident notes is easy from a drop down list or keypad entry

Audit trail on all activities with extensive CarePoint reporting

Benefits

Works on all iOS® devices¹

Allows your caregiver staff to communicate with each other

Better management of staffing and resource utilization

Does not require a cellular service subscription

Devices can be shared among caregivers with individual login credentials
